

Vejarano KERATAx Diamond Knife

This unique Diamond Knife, designed in conjunction with Dr. Manuel Vejarano, director general of the Vejarano Laser Vision Center in México, is specifically for implanting IMT's KERATAx lines of corneal segments.

Featuring 100 titanium micrometer handle with a perpendicular double footplate, this knife utilizes a gem-quality natural diamond blade with a unique beveled tip designed. This knife allows the surgeon to create the perfect incision architecture for implanting the corneal segment.

If you or your facility are performing surgery to treat keratoconus, this knife in conjunction with the Vejarano Delaminator System and IMT's KERATAx plus, el Super Plus y " V " corneal segments will help you achieve superior results.
